The pilots of ASPA de México recognize the importance that the administration of our companies see the pilots who work in them as an integral part for the search of long-term solutions, we make clear the support by all the pilots of ASPA de México in their dispute with the Administration of SAS.

The professional pilots represented by IFALPA seek to make long-term careers that give a high value to the companies where we work, and this must be considered as a key asset.

That is why we recognize the legitimate needs of our colleagues represented by Svensk Pilotförening (SPF) - SAS.

In that same sense, ASPA de México supports them, and we will inform Management of our Carriers of our desire to support our colleagues based on their requests.

Sincerely,

Capt. Pascual Álvarez del Castillo Sosa
Technical & Foreign Affairs Secretary

Capt. José Humberto Gual Ángeles
Secretary General
