Dear Captain Enochson,

As the global aviation industry recovers from the pandemic, SAS management has chosen to use it as an opportunity to evade business transfer laws. It laid off more than a third of its pilots and is forcing those long-standing employees to effectively restart their careers with the SAS's newly established companies, SAS Connect and SAS Link.

Considering these maneuvers by management, we wanted to assure you that SPF has the full support of the more than 4,000 JetBlue pilots. Your fellow pilots stand with you as your union fights for the careers of its members.

Please keep us informed as this situation develops. When appropriate, we will communicate to JetBlue management our intention to support the SPF pilots in accordance with your requests.

In unity,

Captain Chris Kenney

Chairman

JetBlue Master Executive Council

Air Line Pilots Association, International
